

Synesgy™

The sustainability network.

How much carbon footprint was generated by the participants of this event?

WOA, Warsaw, April 23th, 2024

- **What is the Synesgy platform?**
- **Carbon footprint calculator**
- **Presentation of results**

In terms of #ESG competences, the CRIF Group is a member of the UN Global Compact and GRI, and also has within its structures the CRIF Ratings rating agency, operating under the supervision of ESMA.

The Synesgy platform is based on international sustainability standards, including:

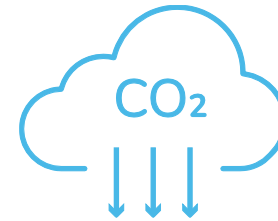

- Global Reporting Initiative,
- Sustainable Development Goals ONZ,
- Taksonomy UE
- ESRS,

and CRIF, as a Rating Agency, has developed its own ESG methodology, which it has been taking into account for years in the assessment of issuers of non-financial companies from the European Union.

**number of
completed
surveys**

18 surveys collected
that is, from **38 %** of
those taking part in our
event

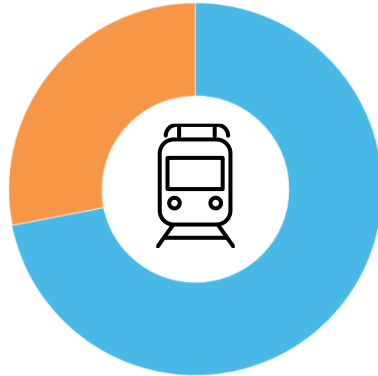

**how much CO2 has been
generated?**

2.53 tCo2e

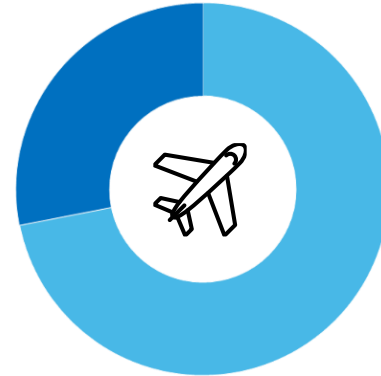

362 trees
will absorb Co2e for 1 year

DIRECTIONS – DISTANCE – 1.43 t Co2e

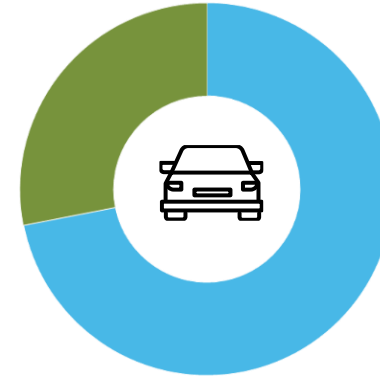

3 number of people

292 km/TRAM

5 number of people

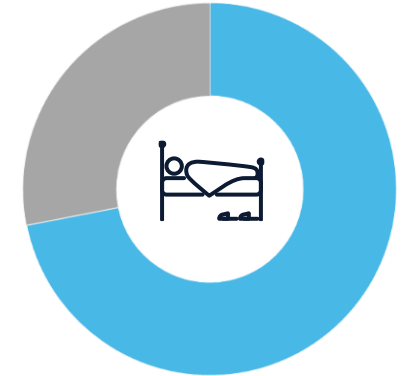

14 994 km

4 number of people

750 km

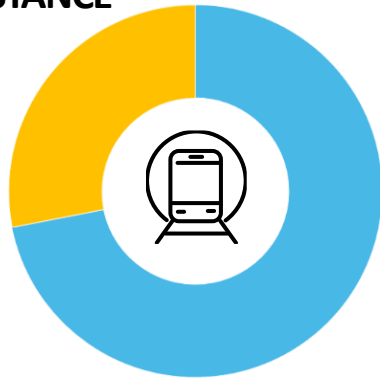

ACCOMMODATION – 1.1 t Co2e HOTEL – 17 nights

11 number of people

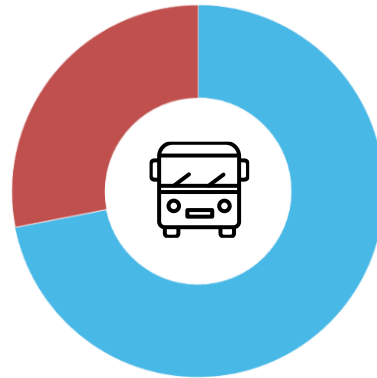

65 kg the amount of CO2 generated per night

DIRECTIONS - DISTANCE

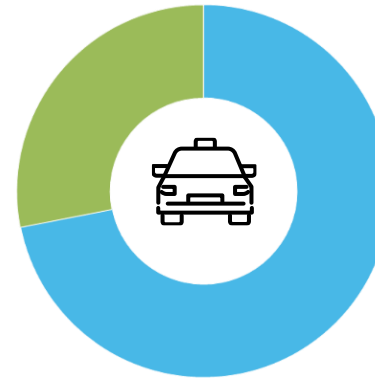

1 number of people

28 km / SUBWAY

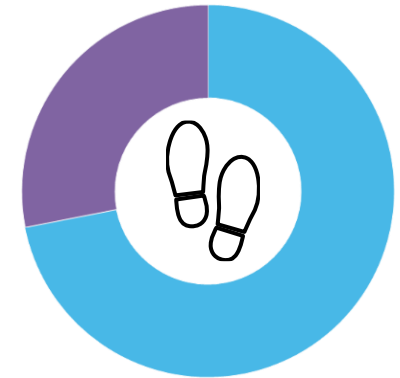

1 number of people

22 km

2 number of people

25 km

6 number of people

7 km

0 emission
