

digifactor

use case from Hungary

Boglárka Wanderscheid

Head of Working Capital Solutions Directorate
K&H Bank Hungary

MYTHS
BUSTED

interface with ,NAV' (phase 1)

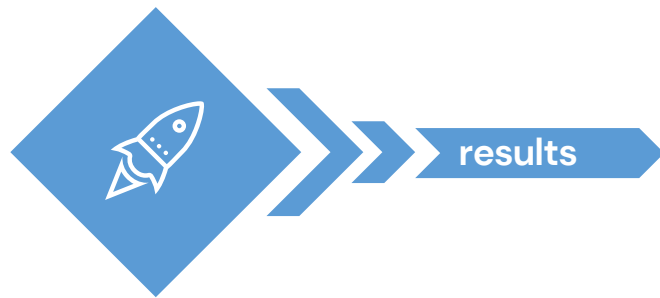

supplier wants to get new invoices financed

Faktor1 provides a list of eligible invoices for suppliers to select from for financing online

overnight import of new supplier invoices from **NAV DB**

- & innovative solution
- & quick and easy
- & user friendly
- & minimalized administration (front-end, back-end)
- & mitigating risk, fraud

factoring is a lots of work to do, too much administration

they try to be fast, however I see there is big workload on them and a shortage of resource.

they have a solution oriented attitude in products . Always try to find a solution that is close to our special needs

it would be great if xls table could be available online about interests and costs beside the pdf

*we like using Digifactor
Transparent,
easy to use
Much better than communicating via emails*

it would be great if the detail transfer statement could be available online

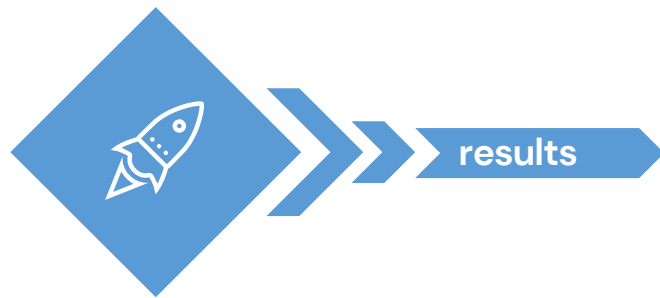

docu-store (phase 2)

supplier wants no longer paper based documents, also do not trust in normal email flow

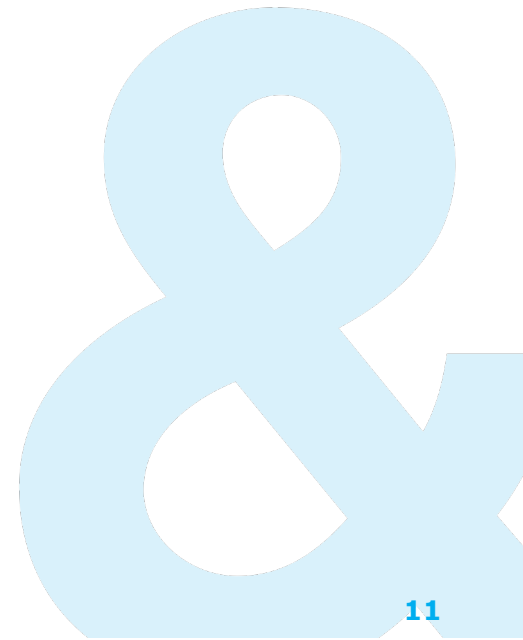

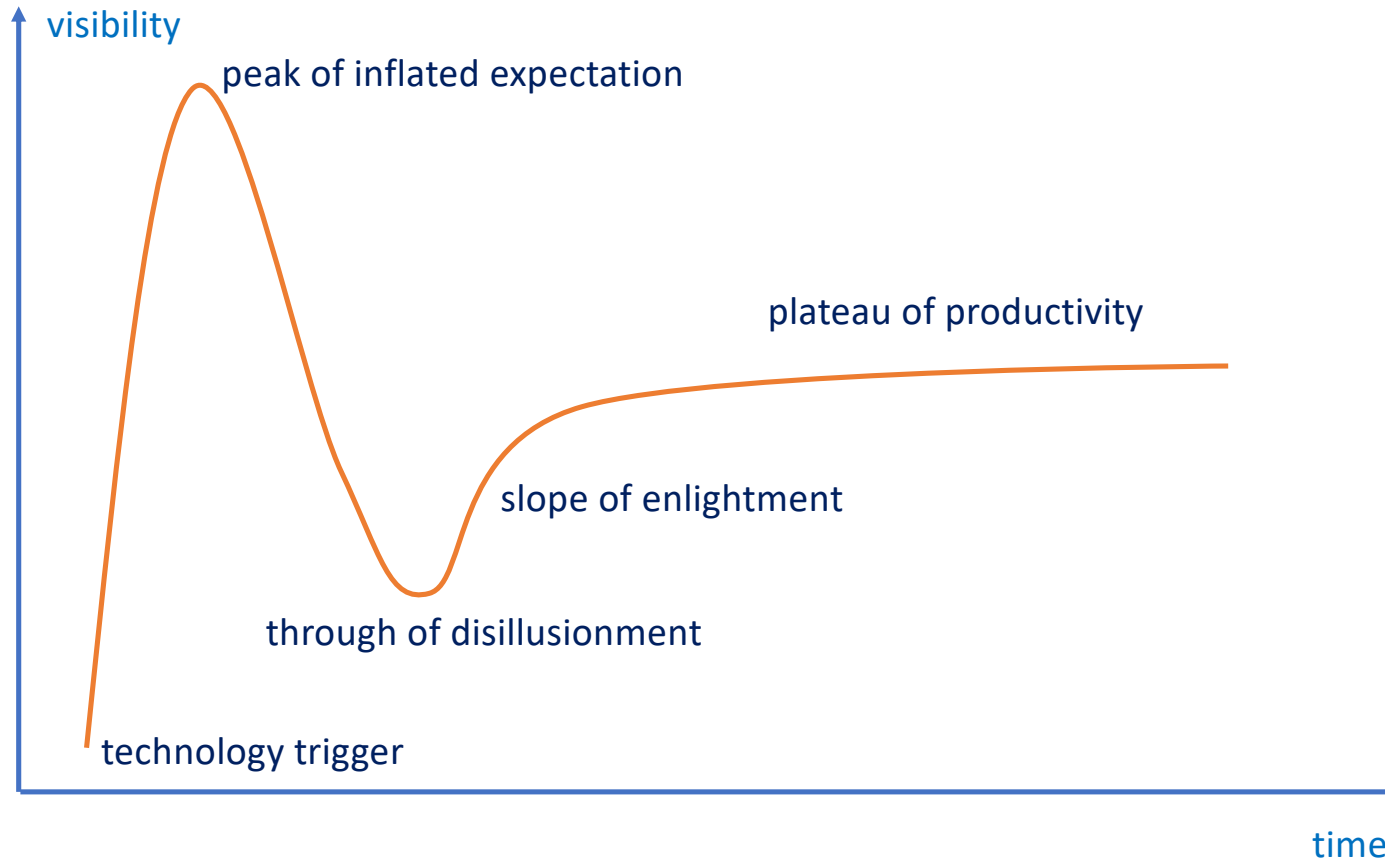

pull system document handling, i.e. documents being able to be downloaded by user

- & decreasing the workload at BO
- & increasing security by encrypted channel
- & e-invoicing
- & internal recommendation

hype cycle
